Presentation Title

Presentation Title

Short subtitle or purpose

One-line context for the audience.

Executive Summary

- Key point one
- Key point two
- Key point three
- Decision or outcome needed

Current Architecture

Component Breakdown

Component	Purpose
Dashboard	User-facing portal, reports, compliance views
API	Authentication, jobs, evidence ingestion, scanner endpoints
Workers	Long-running scans and scheduled jobs
Database	Jobs, findings, evidence metadata, users
Object storage	Raw evidence artifacts and reports

Evidence + Dashboard
```

Technical Details

Area	Details
Backend	FastAPI / Python
Database	PostgreSQL
Deployment	Docker Compose / Dokploy
Storage	S3-compatible object storage
Security	Tokens, credentials, evidence checksums

Risks And Mitigation

Risk	Mitigation
Long-running scans affect UI	Keep scanner workers separate from portal
Evidence format mismatch	Use common connector schema
Deployment drift	Use Docker Compose and documented env files
Production monitoring gaps	Add uptime, logs, metrics, and alerts

---

Next Steps

1. Step one

2. Step two
3. Step three
4. Owner and timeline

Recommendation

State the recommended action clearly.

Keep the final sentence crisp for the audience.
